MUKESH DEWASI

Student Developer | First-Year College Student

Location: India | GitHub: github.com/mukeshdewasi4524-lab | LinkedIn: linkedin.com/in/mukesh-d-a83ba8397

EDUCATION

First-Year College Student

Focus: Computer Science Foundations, Logic Formulation & Web Technologies

TECHNICAL SKILLS

Programming Languages:	Python, JavaScript (ES6+)
Web Technologies:	HTML5, CSS3, Responsive Design, Flexbox, CSS Grid
Developer Tools:	Git, GitHub, VS Code, Browser DevTools, Terminal / Bash
Core Competencies:	Problem Solving, Clean Code, Semantic Markup, Web Accessibility (a11y)

FEATURED PROJECTS

ShopLedger | *Retail Shop Management & Ledger Concept [In Progress]*

Technologies: React, JavaScript, Modern UI/UX, State Management, FinTech Concept

- Designing a smart digital ledger and shop management tool to simplify merchant bookkeeping.
- Implementing customer balance tracking, daily cash flow logs, and product inventory alerts.
- Built with an offline-first mindset for fast response times in retail environments.

Personal Developer Portfolio | *Modern Interactive Portfolio [Active]*

Technologies: HTML5, CSS3, Vanilla JavaScript, GitHub REST API, Responsive Design

- Engineered a production-ready portfolio featuring a dark navy and neon lime glassmorphism UI.
- Built an in-browser interactive developer terminal supporting command-line exploration.
- Integrated GitHub public REST API to display real-time repositories and language statistics.
- Crafted client-side validation for contact interactions and full keyboard/screen-reader accessibility.

My First Website | *Personal Digital Milestone [Live]*

Technologies: HTML5, CSS3, JavaScript, GitHub Pages

- Developed and deployed my first personal website exploring front-end web fundamentals.
- Implemented responsive layouts with Flexbox and CSS Grid across mobile and desktop.
- Deployed live via GitHub Pages: mukeshdewasi4524-lab.github.io/my-first-website/

DEVELOPMENT PRINCIPLES

1. Learn. Build. Improve: Committed to consistent daily coding, building practical tools, and mastering fundamentals.
2. Clean Code & Simplicity: Prioritizing semantic HTML, modular CSS, readable vanilla JS, and zero bloat.
3. Accessibility & Performance: Striving to make digital experiences fast, responsive, and usable for everyone.
